

FinOps

The **FinOps** methodology maximises the value of the investment in the Cloud, optimising costs, improving operational efficiency and making data-driven decisions.

1

Improvement

Optimising performance and resource utilisation in the cloud.

2

Governance

Appropriate allocation of resources and costs to teams and projects.

3

Accuracy

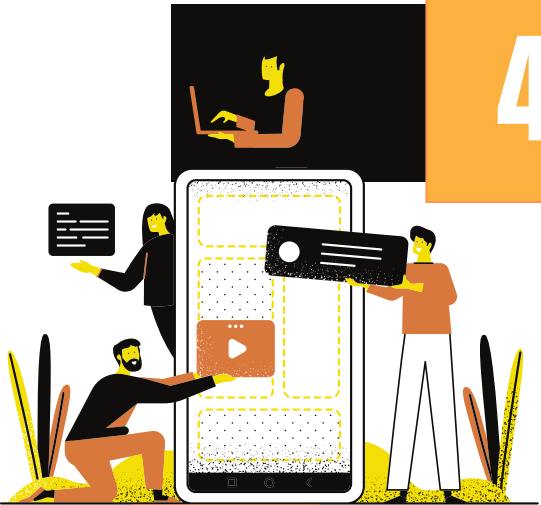

Appropriate allocation of resources and costs to teams and projects.

4

Detention

Identification and mitigation of unplanned or excessive expenditure.

5

Tracking

Monitoring and cost control in the cloud.
