

FinOps + Analytics

Benefits of having a dashboard to control and manage the Cloud:

01

REAL-TIME VISIBILITY

Constant monitoring and early detection of budget deviations.

02

INFORMED DECISION MAKING

Allocate resources and optimise costs. Identifies areas of overspending or underutilisation.

03

MONITORING OF KPIS

Track key performance metrics related to cloud costs.

04

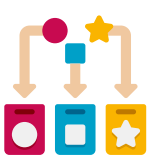

ALERTS AND NOTIFICATIONS

Receive warnings when costs reach certain thresholds and take preventive measures.

05

DETAILED BREAKDOWN:

Detailed vision by areas and components to attribute and understand where the investment is at any given moment.

06

CORRECTIVE MEASURES

Identify reasons for increased cloud spending and take action immediately.

07

FULL COST OVERVIEW

Clear and unified recording of all expenses in the cloud no matter how many services or accounts you have.

08

FACILITATES COLLABORATION:

Promotes the participation of different departments within the organisation, encouraging communication and collaboration.
